sudo nmcli -p connection show

You should see a list like this:

```
====================================
  NetworkManager connection profiles
====================================
NAME                UUID                                  TYPE      DEVICE
------------------------------------------------------------------------------
Wired connection 1  bd220d18-7d6a-36a5-9820-4f67de2c01fc  ethernet  eth0
mywifi              2359440b-8991-4c86-a905-b011dced4587  wifi      wlan0
lo                  c29ba7c5-98ff-4fa0-8d8e-06b30b8ec384  loopback  lo
```

sudo nmcli c mod "Wired connection 1" ipv4.addresses 10.0.0.x/24 ipv4.method manual

sudo nmcli con mod "Wired connection 1" ipv4.gateway 10.0.0.x

sudo nmcli con mod "Wired connection 1" ipv4.dns 8.8.8.8

sudo nmcli c down "Wired connection 1" && sudo nmcli c up "Wired connection 1"
